Pallabrite™ Mirror
Palladium Plating Solution (Decorative)

Product Description:

Pallabrite™ Mirror is a palladium plating solution which is used over or under many different metals. The solution plates a grey/white coating. Pallabrite™ Mirror is a ready to use solution. Do not add water. Pallabrite™ Mirror is nontoxic and non corrosive to the environment.

Applications:

To plate over silver, gold, cobalt, and platinum.

Cautions: Read all safety information before using this product.
1. Use only with proper ventilation.
2. Wear gloves, safety goggles, apron.
3. Avoid contact with eyes and skin.

Operating Conditions:

<table>
<thead>
<tr>
<th>Temperature</th>
<th>95° F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Density</td>
<td>2-3 Volts</td>
</tr>
<tr>
<td>PH</td>
<td>9-9.5</td>
</tr>
<tr>
<td>Anodes</td>
<td>Platinized Titanium or Pure Platinum. Do not use stainless steel.</td>
</tr>
</tbody>
</table>
**Bath Set Up:**

1. Fill tank or beaker with Pallabrite™ Mirror and heat to maximum 95° F.
2. Check connections from rectifier to anode and work, be sure the negative (-) and positive (+) wires are connected properly. The work should be charged negative (-), and the anode positive (+). Turn rectifier on.
3. Plate for 8-10 seconds at 2.5-3 volts.
4. Remove pieces after plating. Pieces should have a white/gray tint.
5. After plating rinse part thoroughly in water and dry.
6. If pieces come out too dark then plate at a lower voltage for 6-8 seconds.

**Pallabrite™ Mirror** is a rugged bath and guidelines have been provided to help assure the long life of this bath. If, however, a problem should arise that cannot be solved by any of the above recommendations, or recommendations by our or any other qualified laboratory, the bath may need to be replaced: Transfer to a DOT approved container. Check with local authorities for proper disposal methods.
